Description

The user would like to adjust the width of the Search page box to fit. You may expand it so that the Search page box is wider to the side. Normally, the Search page is long down to the bottom.
The problem is that when a user zooms out, the text becomes smaller and difficult to view.

History

#1 - 03 Nov 2023 16:52 - Kittisak Isarapongporn

- Subject changed from Adjust the width of the Search page box to fit to Adjust the width of the Search page box and hide/unhide the column according to filtering data (Traceability/Packing)
