Description			
Problems: 1. INNER PACKING app prints the all cases of contents label for PBP items. 2. INNER PACKING cannot confirm the PBP items properly. 3. Leader/Sub leader cannot confirm the work on OUTER area. Cause: 1. INNER PACKING app didn't send the case_no/packing_no to web socket for inquiry the related label only. 2. INNER PACKING app sent the wrong inner_act_qty. 3. Users process the INNER after OUTER finished. Solution: 1. Return the only related contents label with case_no and packing_no (seq-itm) while scanning the PBP tag receive (Web socket && INNER PACKING app) 2. Fix bugs change the wrong inner_act_qty that always be zero to correct number (bag_qty_in_packing * parts_qty_in_bag) (Web socket && INNER PACKING app) 3. Correct the all OUTER finished data (Database)
